

## Band Pass Filter 901~924MHz

| Electrical & Mechanical Specifications |                      |
|--|----------------------|
| Center Frequency                       | 915MHz               |
| Frequency Range                        | 902~908MHz           |
| Insertion Loss in BW                   | 1.5dB max.           |
| Passband Ripple                        | 0.2dB max            |
| Return Loss in BW                      | 20.0 dB min.         |
| Attenuation (Min)                      | 45dB @850~894MHz     |
| Power Handling                         | 30 W                 |
| Dimension(W*D*H)                       | 102 * 60 * 48mm      |
| Operating Temp. Range                  | -20 °C ~ + 70 °C     |
| Connector                              | N Type Female        |
| Finish                                 | Black Epoxy Painting |
